

2017 COMMUNITY PHARMACY TRENDS & INSIGHTS REPORT

GET AN INSIDER'S LOOK AT PHARMACY IN CANADA TODAY

This is an era of unprecedented change—even transformation—for both the profession and business of community pharmacy in Canada.

The 2017 *Community Pharmacy Trends & Insights* report is your insider's guide to the industry.

This popular, bi-annual publication provides the most comprehensive and accurate overview of pharmacists' perceptions, behaviours and opinions on the most important factors influencing their profession.

Featuring exclusive data from the comprehensive 2016 national Trends & Insights surveys of community pharmacists and community pharmacy owners and managers, the report gives a rare and perceptive view of the challenges faced by both the patient care professionals and the people managing community pharmacies.

In addition to an analysis of survey data, the report also incorporates data from numerous industry sources to provide a comprehensive view of community pharmacy, including prescription drug usage and trends, retail pharmacy indicators, human resources updates, pharmacy regulatory and advocacy activity, consumer opinions and more.
